CASE STUDY #5 - Weber Canyon, Devil’s Slide, UT

Answer all questions and place annotation on the map as requested.
1. Draw a north arrow on the map.

2. What State is this map taken from?

3. Sections are surveyed areas 1 mile square shown on the map with a number in the center. Locate a section on the map that is actually “square” and determine the map scale.

4. A number of sections on this map are very distorted in shape and not close to being square. Why do you think this is? HINT: the contour interval for the map is 80 feet.

5. The Weber River is located in the middle of the map area. Which way does it flow?
